This document contains three different sections which should be read together to understand the combinations of APCs available in SPIMM:

1. APC-APC Matrix: Covers which combinations of APCs can be used in SPIMM / UKC based on the Mandatory SPIMM dataset being used
2. Additional Information: Covers details as to what APCs can and must be used in combination
3. 1LG - 1EL - 1EN - 1SG: Covers which APCs can be used with each Mandatory SPIMM APC

Instructions	1. This matrix lists the combinations of 1/11s that can be used on a goods item on a SPIMM or UKC declaration dataset. The tab 'Additional Information' outlines the details as to the combinations for each APC and must be read to understand the detail of what combinations are available.
	2. It should be read strating from an APC on the left (Column A) and reading across horizontally (Row 13) to understand the requirements of each APC
	3. The key outlines if the combination is invalid (N), which of the mandatory SPIMM /UKC APCs can be used on a Goods Item with this APC (X), if a combination is available dependent on the mandatory APC used (D), if the an APC other than one of the mandatory SPIMM / UKC APCs is required in with this APC (M), and if the combination is available without any restrictions (A)
	4. Always read the tab in the 'Additional Information' tab to understand the specific conditons and restrictions around a combination, namely, how the mandatory APC determines which additional APCs can and must be used. This tab also includes details as to the scenarios for which mandatory APCs are required. For example, 15P must be used with either A04 or 1NR or 1VW - this is covered in the 'Additional Information' section
	5. For example, APC A04 cannot be use with A10 or F47, must be used with either 1EL,1EN,1LG or 15G, must be used with 15P, and can be used with 1GO, 1GP, 1PN, 1RM, 15C, 15R, 1TB depending on the Mandatory APC used

KEY	N	Invalid combination
	D	Available depending on which mandatory APC is used (Certain APCs will be available or restricted depending on which mandatory APC is used in combination with this APC) - Please refer to 'Additional Information' for detail.
	X	Mandatory APC - At least one of 15G, 1LG, 1EN, 1EL must be present on a H8, I1 C&F, EIDR NOP. Only one of these four APCs can be entered against a goods item. At least one of 61G, 62G,63G,71M or 24G must be present on a C21i. 61G, 62G, 63G can be used on a single goods item. If 24G or 71G are used, no other APC can be declared on the C21i
	M	Mandatory - Please refer to 'Additional Information' for detail.
